Session 3: where to go

Camera snapshot. Red = 32 floor cells (12 in) inside or near the phone triangle that sessions 1 and 2 never visited. Numbered circles = stand spots.

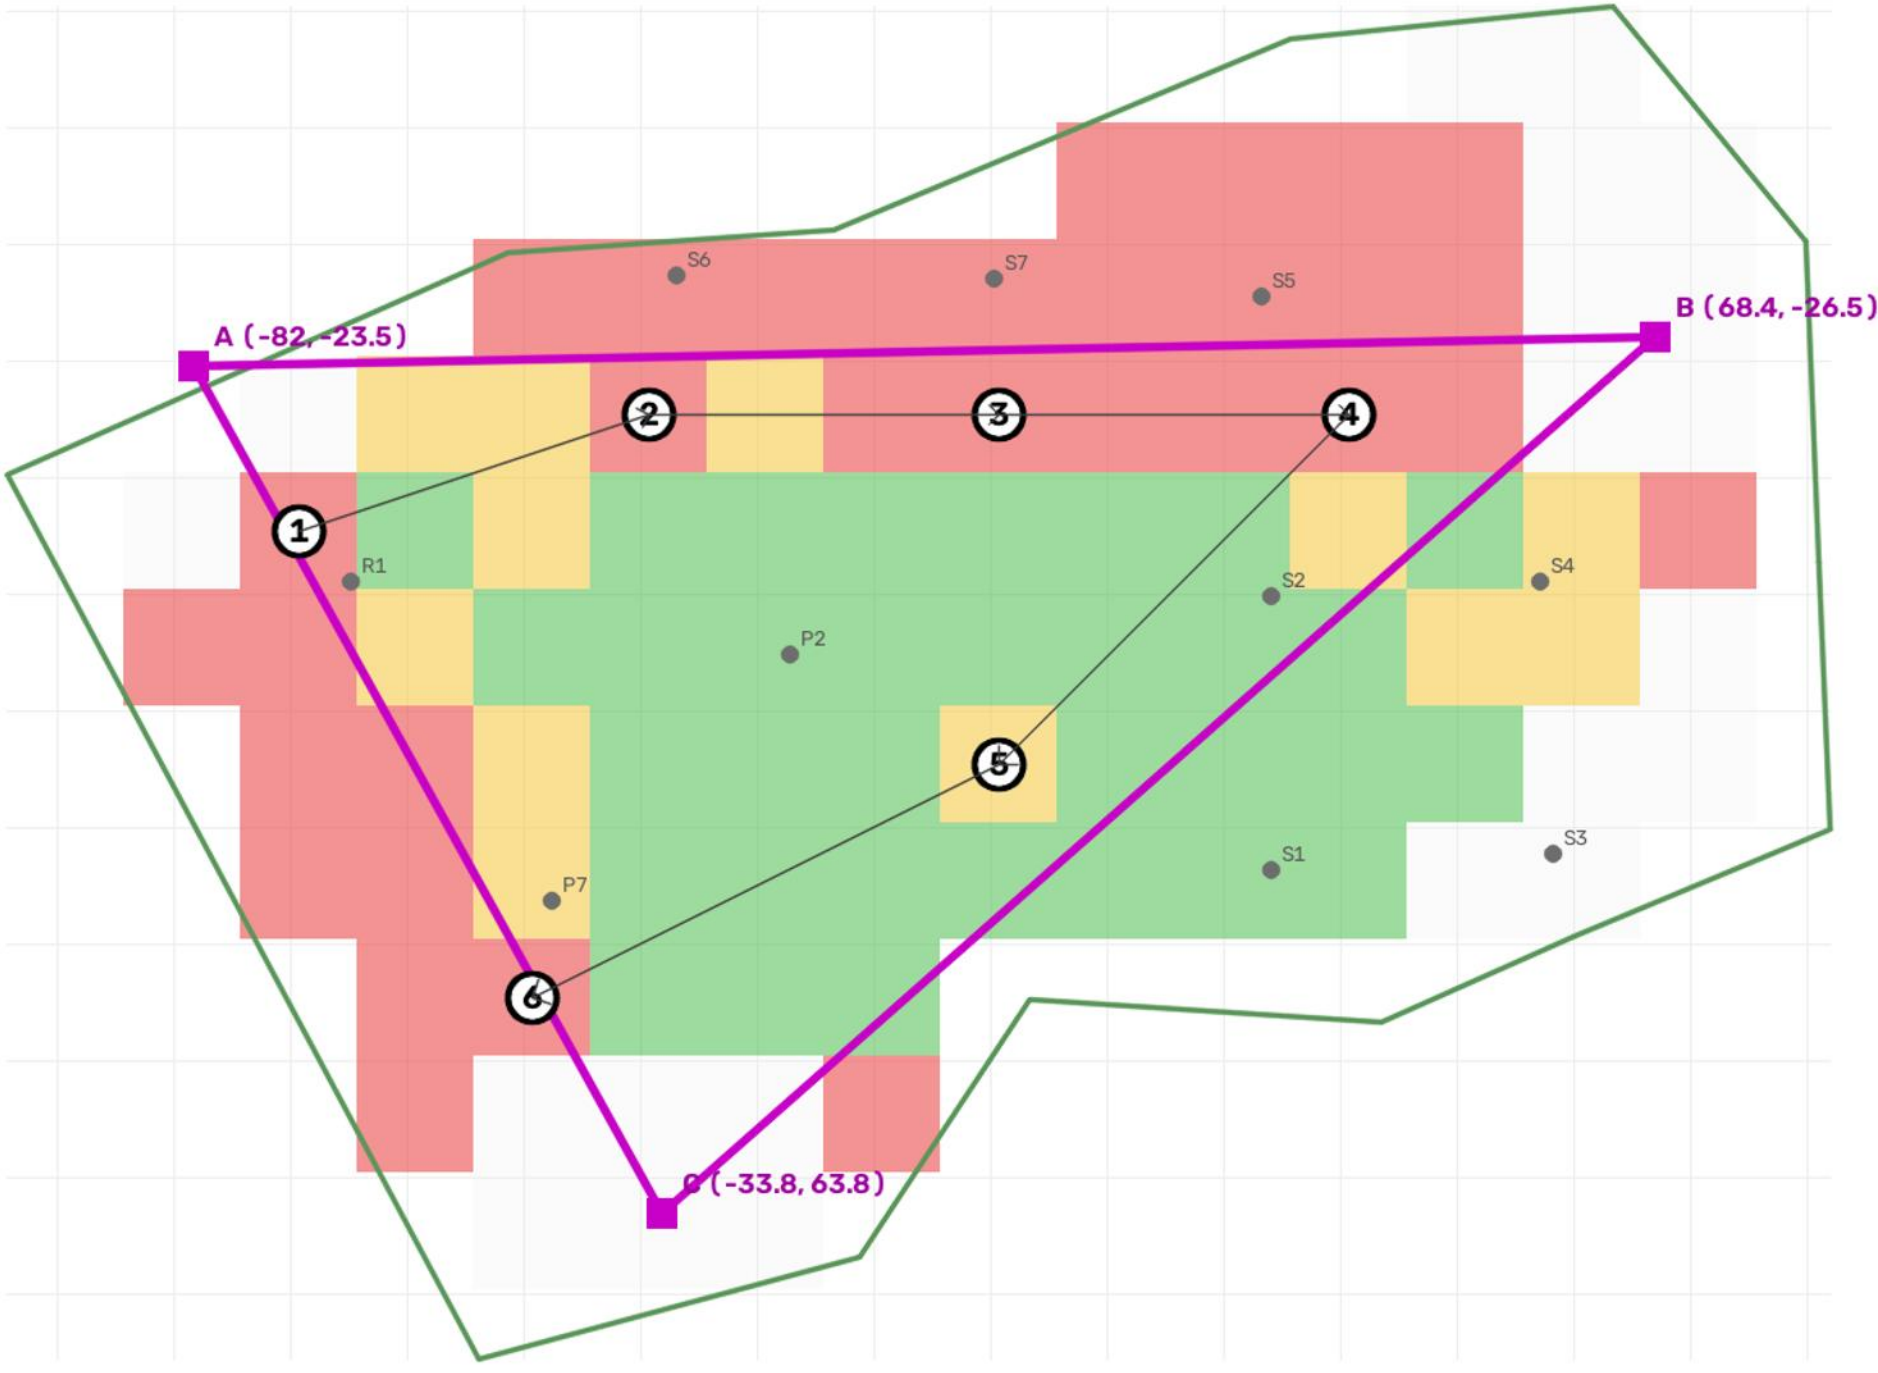

never visited: go here thin (< 10 s) well covered phones and their triangle

Floor plan (inches from R2)

x toward the right wall, y toward the desk. Phones A, B, C at the measured positions. Well covered 33, thin 12, never visited 32 cel

never visited: go here thin (< 10 s) well covered phones and their triangle

Stand spots for session 3

Visit them in this order, twice around if time allows. Coordinates are floor inches from R2.

Spot	x (in)	y (in)	Near
1	-71	-7	8 in from R1
2	-35	-19	15 in from S6
3	1	-19	14 in from S7
4	37	-19	15 in from S5
5	1	17	12 in from P3
6	-47	41	7 in from P6

How to run it (about 8 to 9 minutes, same claps and settings as the other sessions):

- Claps: 3 at the start and 3 at the end, at the center sticker S2, facing the camera.
- 8 cycles: sweep the red zone for about 30 s, then stand still at the next spot for 25 s.
- Keep the sweep inside the red and yellow areas. Skip the middle band, it is already well covered.
- Face a different direction at each visit: the door, the desk, the right wall, the sofa.
- Afterwards, 2 to 3 minutes of silence: nobody speaking or moving.

Do not move the phones. Phone positions are the measured ones above.
